We are pleased to announce the solo exhibition of Naritaka Satoh '白い黒 黒い白' at cassette from June 28, 2024 (Fri.).

Naritaka Satoh's work is known for works that depict extremely realistic close-ups of human faces and flowers with pencil, which he then paints over with abstract brushstrokes of acrylic paint. In particular, by covering expressive elements like "eyes" and "petals" with acrylic paint, he emphasizes the hidden truths and beauty within these symbols.

There are two sides to every story, realistic beauty resides in the danger that balances on the edge of the boundary line between that. We hope you will be able to sense from his works, which take an enormous amount of time to complete.

In addition to the paintings, this exhibition will also feature mirrors that allow the viewers immerse in the works. This will be the first exhibition in Fukuoka and Kyushu, so please stop by if you are in the area.

People only see reality they want to see.

They leave the facts behind from what we avoid seeing, and indulge themselves in a world of fantasy.

By looking at the complex and intertwined reality, not only from one-sided perspective, but also from various multilayered aspects, reveal the fact and make "certainty".

-Naritaka Satoh
